#### Sixth Regional 3R Forum in Asia and the Pacific

"3R as an Economic Industry - Next Generation 3R Solutions for a Resource Efficient Society and Sustainable Tourism Development in Asia and the Pacific" Malé, Maldives, 17-19 August 2015

## **Country Report**

(Draft)

### <Mongolia>

------

This country report was prepared by the Government of Mongolia as an input for the Sixth Regional 3R Forum in Asia and the Pacific. The views expressed herein do not necessarily reflect the views of the United Nations.

# Country 3R Progress Report

Name of the Country: Mongolia Name, Designation and Organization Respondent: Mongolian Demolition Association Other Ministries, Organizations, Agencies contributing to Country Report: Mongolia Timeline of Submission: 17 JULY 2015 (Email: 3R@uncrd.or.jp)

<u>Progress and achievements towards implementation of the Ha Noi 3R Declaration</u> <u>-Sustainable 3R Goals for Asia and the Pacific (2013-2023)-</u>

With the objective of demonstrating renewed interest and commitment of Asia-Pacific countries towards realizing a resource efficient society, the Fourth Regional 3R Forum in Asia-Pacific in 2013 adopted the good-will and legally non-binding "*Ha Noi 3R Declaration – Sustainable 3R Goals for Asia and the Pacific 2013-23.*" The objective of the Country Reporting is to share among international community various initiatives launched and efforts made (such as new policy instruments, legislations, regulations, institutional arrangements, investments or financing, technological innovation or intervention, partnership mechanisms, such as PPPs, etc.) by the member countries of the Forum in addressing each of the underlined goals of the Ha Noi 3R Declaration. This would not only help the member countries to learn various 3R best practices in place across the region, but it would also help bi-lateral and multi-lateral development agencies, donors, development banks in assessing the sustainable needs and challenges to better devise their existing as well as future capacity building programmes and technical assistance in the areas of 3Rs and sustainable waste management.

We request you to kindly fill in the below table as much as possible with relevant data/information. If additional spaces are required, separate sheets could be attached.

Thank you very much for your kind cooperation.

Secretariat of the Regional 3R Forum in Asia and the Pacific United Nations Centre for Regional Development (UNCRD) Email: 3R@uncrd.or.jp

I 3R Goals	
1. 510 0000	s in Urban/Industrial Areas (3Rs in municipal solid waste)
Goal 1	Significant <b>reduction</b> in the quantity of <b>municipal solid waste</b> generated, by instituting policies, programmes, and projects at national and local levels, encouraging both producers and consumers to reduce the waste through greening production, greening lifestyle, and sustainable consumption.
~	t specific 3R policies, programmes and projects, are implemented to reduce the of municipal solid waste?
	Law on Waste (2012)
streams? Uvery H High ( Averag Low o Does r	t is the level of participation of households in "source" segregation of municipal waste (Please check the appropriate box) High (> 90%) >70%) ge (50~70%) r not satisfactory (< 50%) not exist <i>l annual government</i> expenditure per capita (US\$ per capita) in municipal solid magement in 2013-2014
i i	6
	14 billion tugrug / 3.2 million population Exchange rate of dollar :1960 tugrug = 2.3 dollar per capita
Challeng	14 billion tugrug / 3.2 million population
Examples	14 billion tugrug / 3.2 million population         Exchange rate of dollar :1960 tugrug = 2.3 dollar per capita         es (policy/ institutional/ technological/ financial) faced in implementation:         Challenges of all categories         s of pilot projects, master plans and/or policies developed or under development –         vebsites where relevant
Examples	14 billion tugrug       / 3.2 million population         Exchange rate of dollar :1960 tugrug       = 2.3 dollar per capita         es (policy/ institutional/ technological/ financial) faced in implementation:         Challenges of all categories         s of pilot projects, master plans and/or policies developed or under development –
Examples include w Importan	14 billion tugrug       / 3.2 million population         Exchange rate of dollar :1960 tugrug       = 2.3 dollar per capita         es (policy/ institutional/ technological/ financial) faced in implementation: Challenges of all categories         es of pilot projects, master plans and/or policies developed or under development – vebsites where relevant

I. 3R Goals in Urban/Industrial Areas (3Rs in municipal solid waste)
<b>Goal 2</b> Full-scale utilization of the organic component of municipal waste, including food waste, as a valuable resource, thereby achieving multiple benefits such as the reduction of waste flows to final disposal sites, reduction of GHG emission, improvement in resource efficiency, energy recovery, and employment creation.
Q-1 Does the central government have policies or support to utilize or reduce the organic waste
such as composting, energy recovery and improving efficiency in food processing?
Not in food processing
Coal industry, waste processing
<i>Q-2 What is happening to country's organic waste?</i> (Please check the appropriate box) mostly landfilled , <b>Open dumped and open burned</b>
□ mostly incinerated
$\Box$ both landfilled and incinerated
$\Box$ mostly open dumped or open burned
Challenges (policy/ institutional/ technological/ financial) faced in implementation: All challenges including policy/infrastructure/technology/financial, we are faced
Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant No related information
Important policies/programmes/projects/master plans the government plans to undertake within next five years (2015~2020)
National recycling program
<i>Is this Goal relevant for your country</i> ? Highly

Mongolia

#### I. 3R Goals in Urban/Industrial Areas (3Rs in municipal solid waste)

Goal 3 Achieve significant increase in recycling rate of recyclables (e.g., plastic, paper, metal, etc.), by introducing policies and measures, and by setting up financial mechanisms and institutional frameworks involving relevant stakeholders (e.g., producers, consumers, recycling industry, users of recycled materials, etc.) and development of modern recycling industry.

*Q-1 What is the recycling rate of various recyclables?* (Please check the appropriate cell & add more waste streams as relevant for the country)

Rate	Very High	High	Average	Poor	Recycling	Definition
	(>90%)	(>70%)	(50-~60%)	(<50%)	does not	of recycling
Туре					exist	rate*
Paper				13%		
Plastic				11%		
Metal				2.5%		
Construction				25-30%		
waste						
e-waste					###	
others						

\*Note: Please specify in the cell which of the following definitions(ie., 1 or 2 or 3) is followed for recycling rate Definition 1: (collected recyclable waste)/(estimated generation of waste)

Definition 2: (volume of utilized recyclable waste)/(volume of raw material)

Definition 3: (volume of utilized recyclable waste)/(volume of collected waste for recycling)

**Q-2** What specific policies are introduced at local and national level for prevention or reduction of waste streams – paper, plastic, metal, construction waste, e-waste?

#### Q-3 What is the rate of resource recovery from various waste streams?

Rate	Very High	High	Average	Poor	Recycling
			0		
Туре	(>90%)	(>70%)	(50-~60%)	(<50%)	does not exist
Paper					###
Plastic					###
Metal					###
Construction					###
waste					
e-waste					###

(Please check the appropriate cell & add more waste streams as relevant for the country)

#### Q-4 What is the level of existence of resource recovery facilities/infrastructures in cities?

Level	Every Major	Few Major	Does not	Supportive	No supportive
	City	Cities only	exist	policy or	policy or
Туре				programmes	programmes
				exists

Is this Go	oal relevant for your country?	Highly	$\Box$ Partially	□ Not at all

I. 3R Goals in Urban/Industrial Areas (3Rs in municipal solid waste)
Goal 4 Build sustainable cities /green cities by encouraging "zero waste" through sound
policies, strategies, institutional mechanisms, and multi - stakeholder partnerships
(giving specific importance to private sector involvement) with a primary goal of
waste minimization
Q-1 What specific waste management policies and programmes are introduced to encourage
$\tilde{z}$ private sector participation in municipal waste management?
In July ,2015, The governmental cabinets approved the regulation on waste management
Q-2 What are the major waste management areas that have strong involvement of private and
$\tilde{b}$ usiness sector? (Please check appropriate boxes and add other areas if not listed below)
waste collection
$\Box$ resource recovery
□ waste recycling
$\Box$ waste to energy, composting, etc.
$\Box$ PPP projects in waste sector
Challenges (policy/ institutional/ technological/ financial) faced in implementation:
8
Examples of pilot projects, master plans and/or policies developed or under development –
include websites where relevant
None
Important policies/programmes/projects/master plans the government plans to undertake
within next five years (2015~2020)
Making tax free for green technologies in terms of import

		50	

I. 3R Goals in Urban/Industrial Areas (3Rs in Industrial waste)
<b>Goal 6</b> Promote the <b>greening of the value chain</b> by encouraging industries and associated suppliers and vendors in socially responsible and inclusive ways.
Q-1 What percent of companies and industries have introduced green accounting and voluntary
environmental performance evaluation (Ref: ISO 14000)?
$\Box$ Very High (> 90%)
□ High (>70%)
□ Average (50-~70%)
$\Box$ Low or not satisfactory (< 50%)
None
Q-2 What percent of companies and industries have introduced social accounting (Ref: SA 8000) in consultation with their workers?
$\Box$ Very High (> 90%)
□ High (>70%)
□ Average (50-~70%)
$\Box$ Low or not satisfactory (< 50%)
None
Q 3 Does government have a programme for promoting greening of the value chain? What specific policies, programmes and incentives are introduced to promote greening of value chain?
We have "National Green Development policy" 2014
Challenges (policy/institutional/technological/financial) faced in implementation:
Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant
Important policies/programmes/projects/master plans the government plans to undertake within next five years (2015~2020) Sector specific green development strategy
<i>Is this Goal relevant for your country</i> ? Highly

I. 3R Goals in Urban/Industrial Areas (3Rs in Industrial waste)
<b>Goal 7</b> Promote <b>industrial symbiosis</b> (i.e., recycling of waste from one industry as a resource for another), by providing relevant incentives and support.
Q-1 Does your government have policies and programmes promoting industrial symbiosis in industrial parks or zones? What specific policies, programmes and incentives are introduced to promote industrial symbiosis?
NONE
Q-2 How many eco-industrial parks or zones or the like, which is supported by the government, are there in the country?
Challenges (policy/ institutional/ technological/ financial) faced in implementation:
Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant
Important policies/programmes/projects/master plans the government plans to undertake within next five years (2015~2020)
<i>Is this Goal relevant for your country</i> ? Highly □ Partially □ Not at all

Mongolia

Sixth Regional 3R Forum in Asia and the Pacific, 17-19 August 2015, Male, Maldives

sector (including SMEs) to obtain the necessary knowledge and technical skills to foster green industry and create decent, productive work.
Q-1 How many dedicated training facilities or centers are there to cater the needs of SMEs and practitioners in the areas of cleaner production, resource efficiency and environment-friendly technologies, etc.?
NONE
Q-2 Please provide an indicative figure on annual government (US \$) expenditure on building technical capacity of SMEs and practitioners in the areas of cleaner production, resource efficiency and environment-friendly technologies, etc.?
Challenges (policy/institutional/technological/financial) faced in implementation:
Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant
Important policies/programmes/projects/master plans the government plans to undertake within next five years (2015~2020)
<i>Is this Goal relevant for your country</i> ? Highly Dartially Not at all

I. 3R Goals in Urban/Industrial Areas (3Rs in Industrial waste)

Build local capacity of both current and future practitioners, to enable the private Goal 8

I. 3R Goal	ls in Urban/Industrial Areas (	3Rs in Industrial was	te)	
Goal 9	Develop proper <b>classifi</b> towards sound managen		•	waste as a prerequisite
Q-1 Is the Yes	nere a systematic classifica. □ No	tion of hazardous	waste? If so, please	attach.
~	ut specific rules and regula osal of hazardous waste?	tions are introduc	ed to separate, store	e, treat, transportation

II. 3R Goals in Rural Areas
 Goal 11 Promote full scale use of agricultural biomass waste and livestock waste through reuse and/or recycle measures as appropriate, to achieve a number of co - benefits including GHG emission reduction, energy security, sustainable livelihoods in rural areas and poverty reduction, among others.

Q-1 How much amount of -(a) agricultural biomass waste and (b) livestock waste are grossly generated per annum?

#### NONE

**Q-2** How are most of the agricultural biomass wastes utilized or treated? (Please check all appropriate boxes)

□ as secondary raw material input (for paper, bioplastic, furniture, etc.)

□ biogas/electricity generation

□ composts/fertilizers

□ mostly left unutilized or open dumped

 $\square$  mostly open burned

Q-3 What specific policies, guidelines, and technologies are introduced for efficient utilization of agricultural biomass waste and livestock waste as a secondary material inputs towards full scale economic benefits? Relevant websites could be shared for additional information.

Challenges (policy/institutional/technological/financial) faced in implementation:

Examples of pilot projects, master plans and/or policies developed or under development – include websites where relevant
