Japanese home appliances recycling plants are operating in China and other countries (Source: DOWA Eco-System Co., Ltd.)

WtE plant in Beijing, with capacity to handle 1,600t/day, by Takuma Co., Ltd.

MOEJ financially supports Japanese private companies to conduct a Feasibility Study overseas

- Japan has overcome a lot of environment and waste problems over the past 60 years.
- Using these experiences, MOEJ has been supporting other countries through international cooperation.
- Japan's experience shows that good combination of regulation, technology and support gives good result. These components should be transferred as a package for successful international cooperation.
- Japanese experience and technology can transfer to other countries in order to help them with addressing their waste management problems.
