Filling the Gaps

Key Strategic Initiatives

- Establishment of climate resilient infrastructure;
- Optimal exploitation of indigenous renewable energy resources, eco-labeling of agricultural products;
- Promote smart cities, prevent urban encroachments on fertile agricultural and forest lands, provide affordable housing, integrated waste management programme;

Key Strategic Initiatives (Contd.)

- Introduction of market tools to promote value chains of transport management;
- Integrated water resource management, recycling and re-use of industrial and domestic wastewater and integrated coastal management

A circular economy is an alternative to traditional linear economy (make, use, dispose) in which we keep resources in use for as long as possible, extract the maximum value from them whilst in use, then recover and regenerate products and materials at the end of each service life.

CIRCULAR ECONOMY

Proposed Integrated Resource Recovery Facility for Solid Waste Management in Medium & Big Sized Cities
