

Future plan on non-motorized transport towards green growth in Ulaanbaatar city

BATTULGA ERKHEMBAYAR

General director, Environment Agency
Ulaanbaatar city

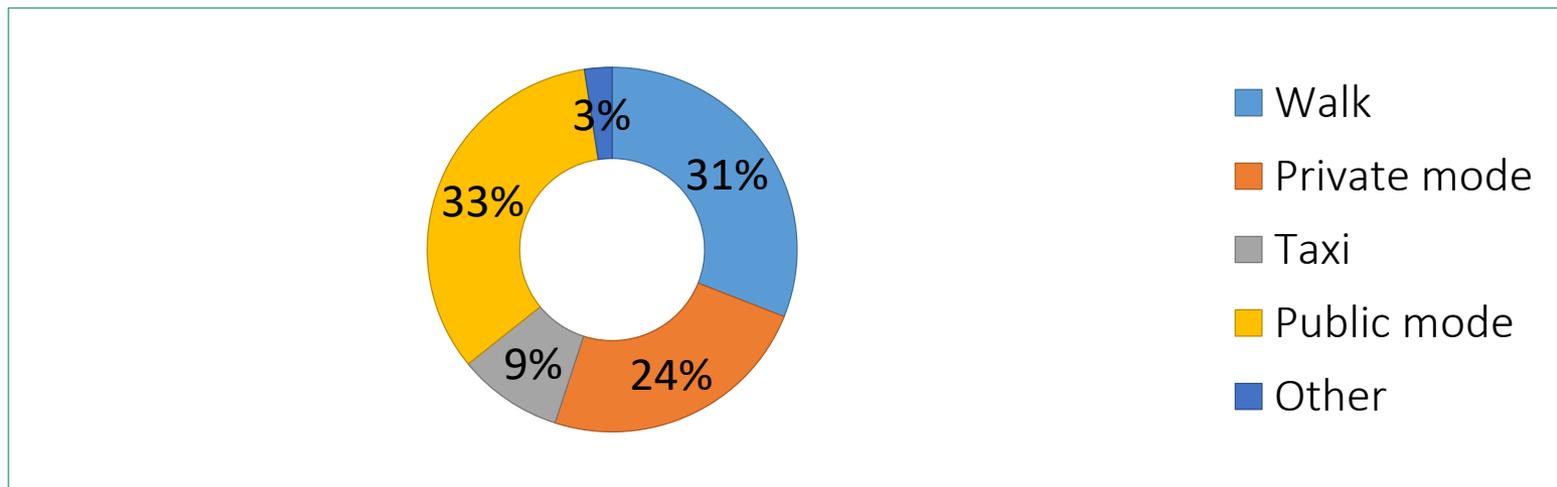

Challenges

- Energy consumption and greenhouse gas emissions
- Congestion and associated losses in productivity of urban areas
- Degradation of human health (through air pollution, noise etc)
- Reduction in human security (through traffic accidents)
- Loss of biodiversity

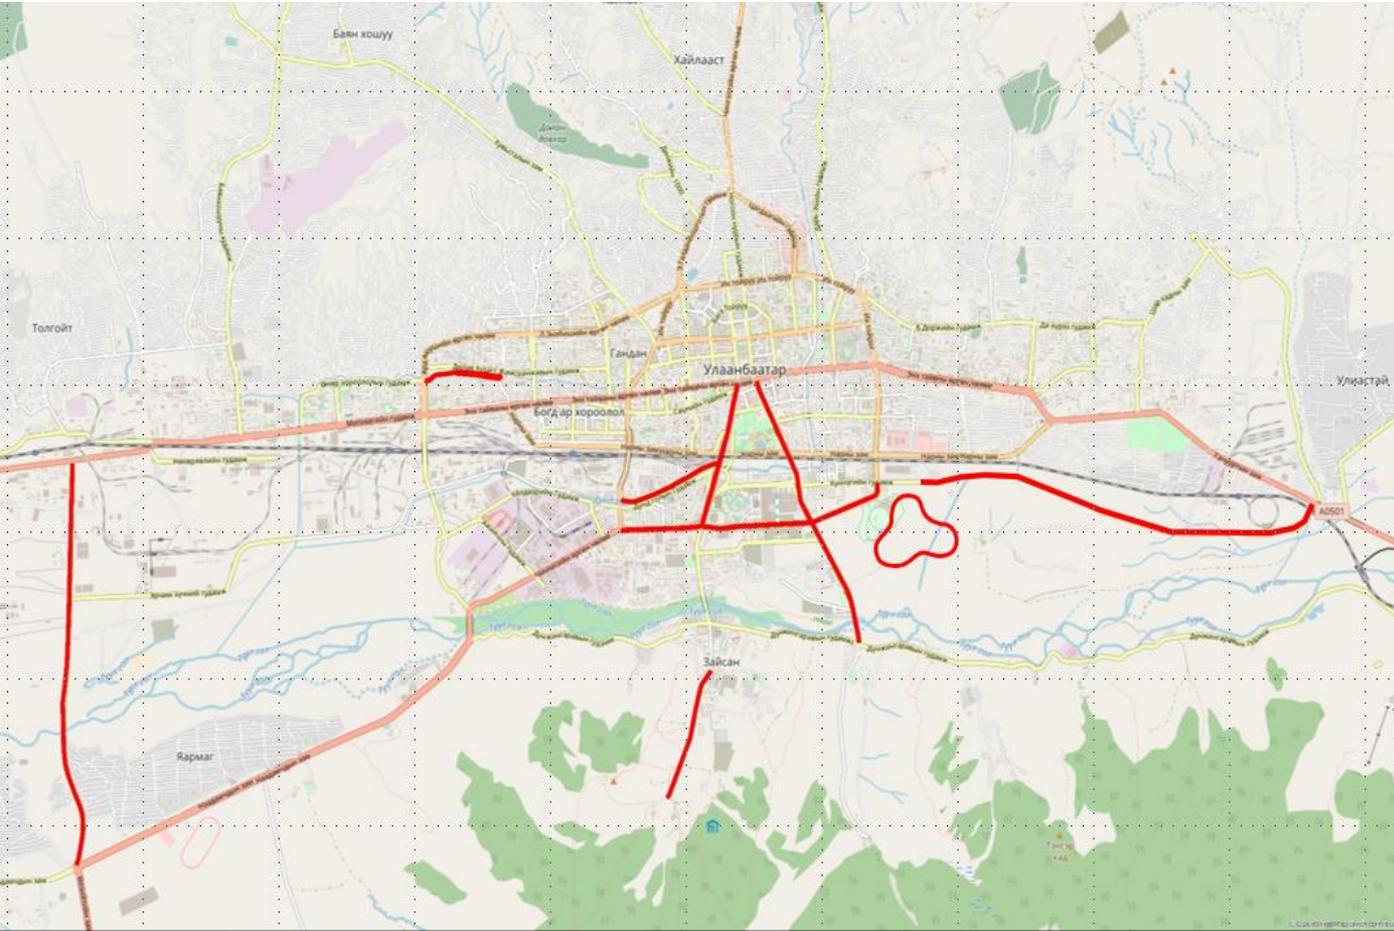

Avoid, Shift and Improve strategy

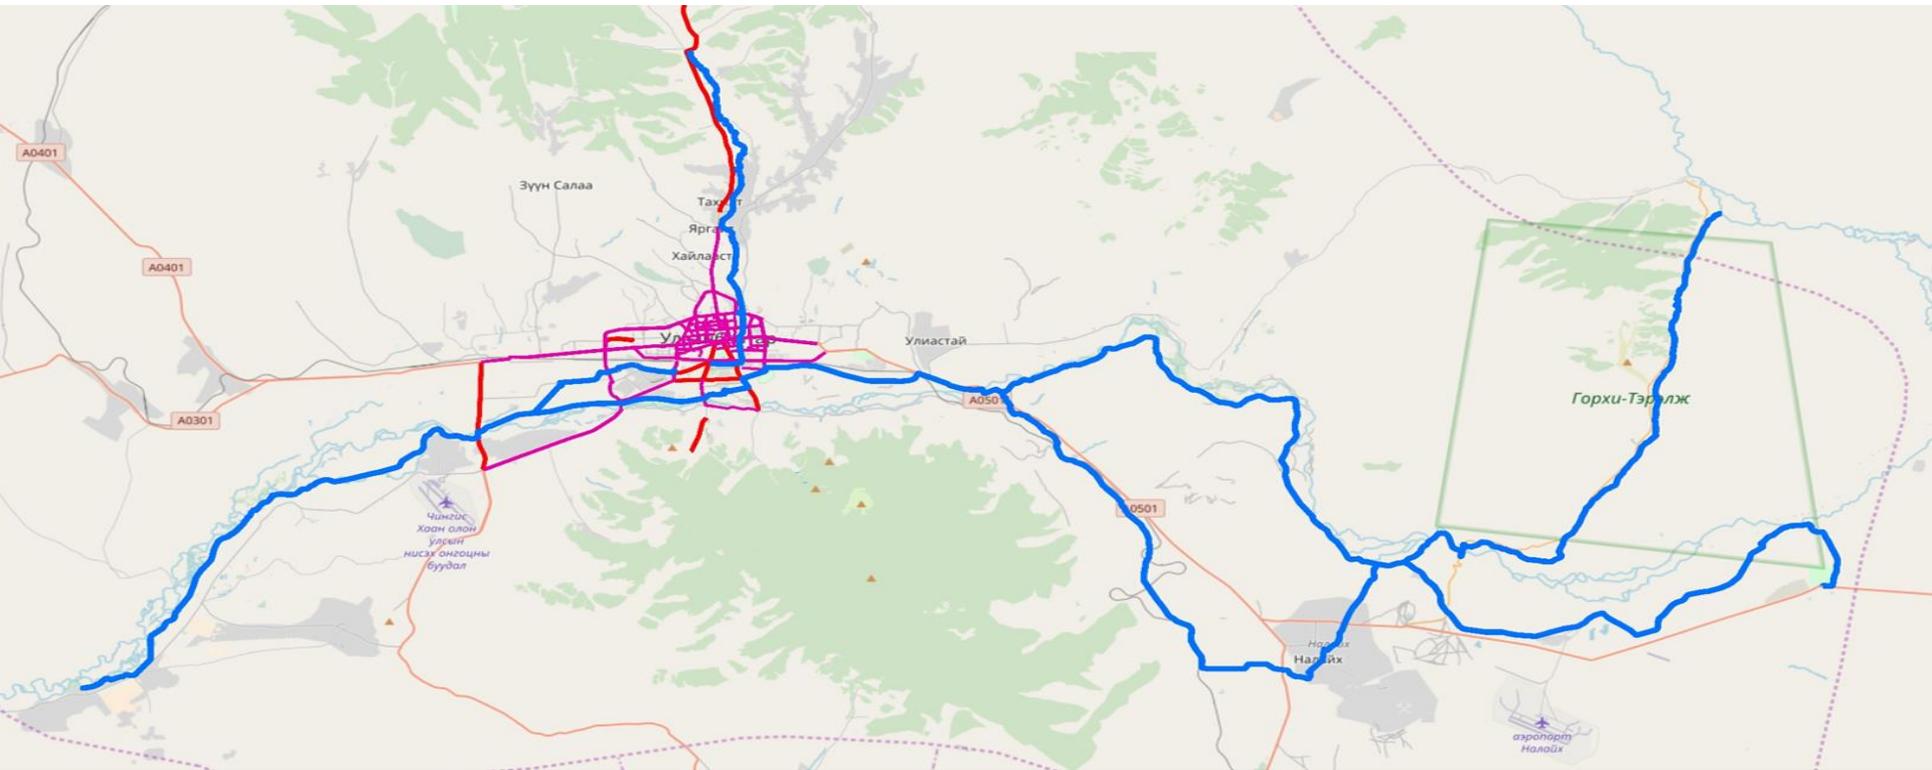

- Avoiding or reducing the number of journeys taken
- Shifting to more environmentally efficient forms of transport
- Infrastructure development of walkways and cycle lanes

Existing bike lanes – 60.5 km

Planned bike lanes – 350.2 km

Bike lanes in the city center 162.79 km

Bike lanes along the rivers 187.4 km

Non-motorized transport modes

Thank you for your attention.
